About This Game

Become a Pirate!

You are a pirate using pistol and cutlass. Show your superior skills to the enemy.

Fire Pistol!

Pistol is a weapon that can kill enemies in the distance. Fire the enemies before they approach you. You can also head shot by targeting the enemy's head.

Using Cutlass!

Cutlass is a good weapon that not only can attack the enemy, but also can defend the enemy's attack. You can also slice the flying object (Skull, Shark, Bomb...etc.)

Kill the Kraken!

You can fight Kraken. Kraken is huge and powerful. You can kill it by shooting Kraken's leg and its eyes. Good luck.

Challenge the record!

Your play is recorded online. You can be the best record in the world. Make your legend.

With your friends

If you and your friend are online, you can team up with a friend, and six people can play a team battle at the same time. Recommend this game to your friends right now.

Exile 3 > Avernum 3 > "Avernum" 3. An average game. Buyable when on sale.. The gameplay seems very dynamic and the challenges are quite inventive. I can't wait to play with friends.. A long time ago, i played a game similar to this but i stopped playing as it got infested by the "mobile gaming style" pay to win system.

So far im having a lot of fun with this and i hope it stays like that.

Pros:

Easy to pick up

Weapons unlock throught levelling

You own a microwave? Then you can run it!

No stuff is OP, it all depends on skill

Cons:

No automatic respawn, you have to click it (or i have not yet found it)

No clear indicator on walls, shot to check

Neutral:

Might need a small tutorial

Could use a quick key for throwable stuff. Awsome game

It's crazy fast paced and extremely funny

Battles get out of hand fast and you leave wanting to stab your friends.

You should get this with them intention to play with friends though.. Scam.

To anyone wondering, this person is a scammer.

You pay £15 for the software which only supports 3 usb devices, you have to pay another £6 for the unlocked software, yes, that's right, you are paying £15 for locked software.

And now the scammer is deleting my posts, that's fine though as I will keep posting them.

He's not even trying to justify what he is doing.

If he thought what he was doing was OK then he would put me in my place, but no, he just deletes my posts. Stay away from this software.

Edit, I have now been banned from the forum for telling people the truth.

Here is a screenshot.

apparantly, I have been banned because me telling you this is a scam is not helpful.

<http://imgur.com/EeMgN1W>. Hate to see her go, but I love watching her leave. Serious Sam 2 is a fun and colorful FPS. It has a lot of different guns and enemies spread over many beautiful, diverse levels, and also a very nice soundtrack. The fights can sometimes be too long and the enemy spawns are occasionally a little redundant, but the overall experience is very entertaining. If you like Serious Sam or shooters in general, you'll enjoy this one.. <<<<{Graphics}>>>>

Club lightning: There are some problems with this game, first of all that it's marketed as a game at all, instead of a media player is beyond me. Why do I get a dancing girl that changes her mind every 5 Seconds about what music she likes? she will say slow songs are too fast for her and apparently she doesn't like Japanese music! I do like the graphics, the club lighting and being able to add your own music. But this could be improved as well by simply have microphone permissions and allowing her to listen to whatever you're listening to, this way the player could set up a playlist right through a radio or streaming service and she could react to that. She should like whatever music you're playing. But if she loves it then you can unlock outfits for her to wear, and items for the club to look cool. Needs more. 3 out of 10

This game is awesome. You get the feel of a boardgame in a fast-pace and beautiful aesthetic package. The "think before you do" element you'd expect from a D&D game is SPOT-ON. It's challenging like it should be, be strategic and you'll do fine as you learn the best way to use each character. Its a great find! You wont be disapointed. 100% will play again. Solid game.. First, this software seemed to be a great piece of kit with a lot of potential, as my old PC was fairly basic and outdated it struggled to run the engine, so I was condemned to wait patiently for a PC that could run it well. While at the same time, the community waited patiently for the updates required to make this game making software what it should be...

My PC eventually happened!!

..the much needed updates for this software, it appears, did not...

Recently, I tried to go onto the official website and read into if there had been any updates or news through there... Only to be taken to a website which is very clearly NOT for this software!!

The URL is "RTSCreator.net", but the website appears to be a Chinese How To site with some very random posts, including some stuff about pressure points on the hands and other such entirely irrelevant topics...

It seems this is not only long abandoned by the devs, but is being sold by them still even though the software was never finished, fixed, or even fully supported by its developers.

And more so with the website not existing anymore, in my opinion everything summed up means this software is NOT WORTH YOUR TIME OR MONEY!. non-japanese visual novels aren't usually this good.... The entire game is worth buying! I wasn't dissapointed with any episodes. I had extreme fun with every single episode and with the limited attempt targets it's even more awesome. This game is not for the story so if you're looking for a good story this one is good however short but the main fun of the game is to replay missions and kill your targetsV do other objectives in different ways. I also enjoy going on a npc murder rampage every once in awhile anyone else? Just me... ok. I'd argue this game is a complete and total scam.

In a previous review i called Sit on bottle the worst game in my steam library. I forgot that game actually works. This game is total and complete luck, and (god forbid if) you get lucky, you to do it 20 times over with seemingly no solution and not all the achievements are functional.

The dev refuses to fix his achievement software (\u2665\u2665\u2665\u2665 you, this does not earn the title of "game") under the guise of "development has stopped." This leaves literally *zero* reason to play the game since it only exists to boost people's numbers and its way of doing that is undeniably flawed and it can't even give you all it has.

Avoid this software developer's whole catalog. You don't need the achievements, as tempting as NeoSticks is. There's like 700k+ you can get if you exclude these neo games. It's just a tiny blip in the numbers.. This software is the best thing that ever happened to vr. I wont be able to switch back now XD. I like making enclosures full of nothing but giant squids.. I have been playing since I was 5 yrs old.

IF only more people would play this!. game is cheap....so...what do you expect?
